Microbiology

- Aerobic Culture
- Systemic Susceptibility
- Topical Susceptibility
  (Ophthalmic or Otic Samples Only)
- NO Susceptibility
- Anaerobic Culture – NO Susceptibility
- Bacterial Isolate ID w/ Susceptibility
- Bacterial Isolate ID – NO Susceptibility
- Blood/Joint Culture – Submit in bottles
- Dermatophyte Culture
- Filamentous Fungi Isolate ID
- Fungal Culture*
- Mycobacterium Culture*
- Mycoplasma Culture*
- Pythium/Lagenidium Culture*
- Yeast Isolate ID

Serology

- ELISA Testing
  - Heartworm antigen DIROCHEK ELISA
  - Equine Infectious Anemia
  - STAT Equine Infectious Anemia
  - Feline Heartworm antibody
  - Rotavirus Antigen ELISA

Parasitology

- Baermann Technique
- Parasite ID
  - Hair or Feathers
  - Tick or Mite (Ectoparasite)
  - Worm (Internal Parasite)
- Fecal Flotation
- Fecal Flotation with quantification if indicated (McMasters)
- Giardia Culture
- Trichomonad Culture**

Stains

- Cryptosporidium modified acid fast stain
- Gram stain
- Mycobacterium acid fast stain

Additional fees will apply for confirmation of ID by molecular methods or susceptibility testing. Additional fees will apply. **Contact laboratory prior to submission.

This form does not include all tests performed by the Clinical Microbiology, Serology, and Parasitology laboratory. For a full list of tests offered, please visit the website or contact our Central Receiving department at 352-294-4726.
